Active Coral Reef Restoration of the Massive Corals in our Lifetime

Dr. David Vaughan

Plant a Million Corals

Thursday, April 6, 2023
1:30 – 2:30 P.M.

CLARK 507, QUISSETT CAMPUS

Dr. Vaughan will summarize 20 years of work on coral culture and restoration, and highlight the projects of developing a coral aquaculture research program and large-scale coral production hatchery, training programs (“Coral College”) in the Florida Keys and other locations. Developing land-based nursery production innovations, and micro-fragmentation, a mistake from breaking the first “test-tube” baby corals.
