Revealing the ocean deep: Next-generation sensing technologies for marine & planetary science

Thursday, May 4, 2023
1:30 – 2:30 P.M.

Clark 507, Quissett Campus

We have mapped more of the surface of the Moon and Mars than our own ocean floor—but that is changing. Professor Ved Chirayath will present three sensing technologies he invented during his time at NASA. These technologies will help us better understand Earth’s marine environments while furthering the search for life on other planets.

Dr. Ved Chirayath
