

FACULTY POSITION JOB OPENING

Coastal Physical Oceanography

The Department of Oceanography of the University of Concepción seeks to fill a faculty position at the Assistant Professor level in the field of Physical Oceanography, with a specialization in Coastal Physical Oceanography.

Profile

- Ph.D. (Physical Oceanography)
- Experience in observational and/or applied coastal modeling
- The ideal candidate should have postdoctoral experience
- Teaching experience at undergraduate or graduate level

Responsibilities

- Teaching, including courses in physical oceanography, quantitative methods such as time series analysis, and specific areas of his/her expertise
- The selected candidate must secure and maintain funding for his/her research, which should also involve undergraduate and graduate students at the Department of Oceanography

Qualifications

- Solid background in physics of the coastal ocean
- Experience working within multidisciplinary groups
- Experience (demonstrated by published papers) that is consistent with the profile
- Skills to communicate his/her own research to the scientific community (publications, scientific conferences, seminars) as well as in activities of science outreach (press, talks for the general public)
- Command of Spanish (both written and spoken) desirable

Application requirements

- Cover letter describing research and teaching experience as well as future plans
- Names and contact information of two colleagues who are willing to provide letters of recommendation
- Copies of relevant publications

Review of applications (pdf format) will begin on May 15 2015, and will continue until the position is filled.
