

## **HARMFUL ALGAL BLOOM RESEARCH SCIENTIST POSITION**

Florida Fish & Wildlife Conservation Commission/Fish & Wildlife Research Institute  
St. Petersburg, FL

FWC invites applications for an Associate Research Scientist position in the Harmful Algal Blooms (HAB) group ([MyFWC.com/RedTide](http://MyFWC.com/RedTide)). The incumbent will plan and conduct systematic, applied research on harmful algae, focusing largely on identifying parameters that influence the physiology, distribution, and abundance of *Karenia brevis* and/or identifying and evaluating mitigation strategies. The successful candidate will also generate collaborative grant proposals and scientific manuscripts and assist with algal culturing, event response, and outreach activities. The position is a full time position (\$52,045/yr) with benefits.

Applicants should have a strong background in phytoplankton physiology and ecology; the demonstrated ability to conduct scientific research; and the potential for securing funding and publishing high quality scientific manuscripts. Minimum qualifications include a M.S. degree in biology, marine science or other relevant field; experience in HAB research; demonstrated communication, writing and analytical skills; and a demonstrated ability to write competitive grant proposals and scientific manuscripts. Ph.D. preferred.

Please see the full position announcement at <http://bit.ly/1P2sHWx>. To apply: (1) submit an electronic State of Florida Employment Application Form and (2) email a cover letter, CV, and the names of three references together in a single PDF document to [FWCHAB@gmail.com](mailto:FWCHAB@gmail.com) by 4/20/15. Both steps must be completed before applicants are considered. Inquiries about the position may be sent to the email address above.
