

UNIVERSITY OF
CAMBRIDGE

Department of Earth
Sciences

University Lectureship in Earth Sciences

We invite applications from candidates carrying out creative and innovative research in Earth Sciences, particularly in areas of structural, metamorphic or tectonic geology, and whose work involves elements of field-based observation or structural/geophysical data collection.

The successful applicant will be expected to develop a vigorous research programme at an international level and will be expected to contribute to the research activity of the Department leading to interaction with academic staff across several areas of the subject.

The person appointed will be expected to actively seek external funds to support their research, to supervise research students and contribute to the Department's undergraduate teaching at various levels. They will play an important role in our undergraduate field teaching and may be asked to help with introductory geological teaching outside of their field of specialisation.

Candidates should have a PhD and an outstanding record of research in a relevant subject area, have shown a talent for connecting disciplines and an imaginative flair in setting the agenda for the future. The Department assists new academic staff as much as possible to establish their research in Cambridge.

Further particulars and information at <http://www.jobs.cam.ac.uk/job/8619/>

The appointments will be made at an appropriate point on the scale for University Lecturers (£38,896 to £49,230 a year) and will be for a probationary period of five years with appointment to the retiring age thereafter, subject to satisfactory performance. *A University Lectureship is broadly equivalent to an tenure track Assistant Professorship in the US.*

The Department is committed to equality and diversity. Details of some of the family-friendly policies operated by the University are at: <http://www.hr.admin.cam.ac.uk/pay-benefits/cambens-employee-benefits/family-friendly>. The University holds an institutional Athena-SWAN silver award.

As well as submitting a CV, your letter of application should include (a) a list of publications, (b) a 1000 word statement covering your current research, future research directions, and teaching experience. The closing date is **Saturday 27 February, 2016.**

Three references will be expected. Candidates are also requested to ask their referees to write direct to the Administrator (ab78@esc.cam.ac.uk) by Saturday 27 February, 2016.

Interviews will be held in the week of 25 April 2016.
