The Cape Cod Stranding Network responds to stranded seals, whales, dolphins and porpoise on Cape Cod and they need your help! Rio Films and CCSN invite you to dive into the cool, clear waters off the coasts of California and Mexico where inquisitive sea lions live, play and give birth to their pups. In the film you will meet the researchers and rescuers who help sick and injured seals and sea lions. In person, you will have a chance to meet the CCSN marine mammal rescue team and “California Sea Lions” director and cameraman, Alan De Herrera.
