

## Topics in Oceanography

### Professional Development Workshop for Educators at the Woods Hole Oceanographic Institution

Explore the world's oceans from the tropics to the arctic. Topics covered in this workshop will show the linkages between biology/chemistry and physics/earth science. Learn how oceanographers use technology to answer important and timely questions.

#### **The mystery of animal migrations: how geochemistry can help ecologists track fish**

Benjamin Walther & Simon Thorrold

#### **Rapid climate change in the Arctic: using new instruments and climate models to investigate a fragile system**

Peter Winsor

Friday, March 30, 2007, 9:30 am – 3:30 pm  
Woods Hole Oceanographic Institution, Redfield Auditorium  
Woods Hole, MA

Lunch, DVDs, Hands-on activities, and PDP certificates provided.

#### **Registration Deadline Monday, March 26, 2007**
