STORMWATER MANAGEMENT IN MASSACHUSETTS

a PRIMER for MUNICIPAL STAFF & VOLUNTEERS

and other Interested Persons on MARTHA'S VINEYARD

In Massachusetts, stormwater regulation at the state level is linked to the protection of wetlands and water quality; jurisdiction at the federal level is broader.

STORMWATER MANAGEMENT IN MASSACHUSETTS will cover

- Jurisdiction & Public Interests
- Three Components of Stormwater Management
- Requirements for Erosion Control and Stormwater Management
- Applicability and Overview of Mass DEP's 10 Stormwater Management Standards
- Construction-phase Issues

Instructors: **Christine Odiaga, CPESC, and Alice Smith** - MassDEP Wetlands Circuit Rider Program

THIS WORKSHOP IS GEARED TOWARDS PLANNERS, ENGINEERS, CONSERVATIONISTS, LABORERS, TEACHERS, STUDENTS, SITE MANAGERS, CONSULTANTS AND ANYONE ELSE WHO IS INTERESTED

Thursday April 12, 2012 - 9 a.m. to 1 p.m.

(Sign-In / Coffee / Networking: 8:45 a.m. Light snacks will be provided.)

Vineyard Transit Authority, 11 A Street, EDGARTOWN

Please REGISTER via e-mail to Christine.Odiaga@state.ma.us

Information is posted at www.mass.gov/dep/water/wastewater/swevents.htm

The purpose of these workshops is to provide **general information** about Stormwater Management, *not* a comprehensive review of regulations & requirements. Since stormwater regulation at the state level is linked to protection of wetlands and water quality, the presentation includes specific information about Wetlands Protection Act (such as jurisdiction, Public Interests and requirements); but other information will apply to upland sites as well. The presentation will be largely conceptual; engineering calculations will not be discussed.

This workshop will include:

- ⇒ Power Point Presentation
- ⇒ Review of On-Line Resources
- ⇒ Hands-On Site Plan Exercise
