

# Sea Change

## An Ocean Conservation Film Series

Co-sponsored by Mass Audubon's Wellfleet Bay Wildlife Sanctuary and the Wellfleet Harbor Actors Theater (WHAT) at the Julie Harris Stage

Join us for documentary screenings and panel discussion moderated by WCAI Radio Science Editor Heather Goldstone.

### Sunday, January 20, 2013

**Sunday, January 20, 2013**  
**The Island President (101 minutes) 3 pm**

Jon Shenk's *The Island President* is the story of President Mohamed Nasheed of the Maldives, a man confronting a problem greater than any other world leader has ever faced—the literal survival of his country and everyone in it. After bringing democracy to the Maldives after 30 years of despotic rule, Nasheed is now faced with an even greater challenge: as one of the most low-lying countries in the world, a rise of three feet in sea level would submerge the 1,200 islands of the Maldives enough to make them uninhabitable.

**Panelists include** Andrew Ashton, Associate Scientist, Geology & Geophysics, Woods Hole Oceanographic Institution; Mark Borrelli, PhD, Director, Marine Geology, Provincetown Center for Coastal Studies; Loring Schwarz, Climate Change Program Director, Mass Audubon; Thomas A. Stone, M.A., Senior Research Associate, Woods Hole Research Center

\$9 Adult/\$7 age 17 and under

### Sunday, February 17, 2013

**Requiem (40 minutes) 12 pm**

The family friendly *Requiem* from Living Ocean Productions documents the true nature and purpose of one of the most misunderstood predators on our planet—the shark. Follow the discovery of an underwater photographer from Hawaii as she becomes familiar with the extraordinary beauty, power, and skills of one of the most infamous classifications of sharks—the Requiem Family. Our educators will introduce the film with fun, interactive shark activities for the audience, and follow-up with an opportunity for families to share their feelings and questions about sharks.  
Single Ticket: \$7 Adult/\$5 age 17 and under

**Sushi: The Global Catch (90 minutes) 2:30 pm**

For many, sushi is the most iconic Japanese cultural export. Documentarian Mark Hall explores its important history in interviews with sushi masters, but also wonders, with wild fish stocks coming under increasing commercial pressures, what does the future hold for your favorite sushi bar? Will the worldwide hunger for sushi continue to grow until wild fish vanish, or will new technology like aquaculture keep plates full? Can sustainable restaurants satisfy consumers, or will competition for declining high-quality resources drive prices so high that only the elite will be able to afford it? *Sushi: The Global Catch* is a fascinating investigation into the cultural and economic impacts of this iconic cuisine.

**Panelists include** David P. Henchy, co-founder, Cape Cod Fish Share; Owen Nichols, Director, Marine Fisheries Research, Provincetown Center for Coastal Studies  
Single Ticket: \$9 Adult/\$7 age 17 and under

**The Big Fix (120 minutes) 7:30 pm**

On Earth Day, 2010, the Deepwater Horizon offshore drilling rig sank creating the worst oil spill in history. According to the global media, the story ended when the well was capped—but that's when the real story began. By exposing the root causes of the oil spill and what really happened after the news cameras left the Gulf states, filmmakers Josh and Rebecca Tickell uncover a vast network of corruption.

**Panelists include** Shawn P. Carey, photographer, Migration Productions; Drew Wheelan, former Gulf Conservation Coordinator, American Birding Association  
Single Ticket: \$9 Adult/\$7 age 17 and under

**Tickets are available online at [www.what.org](http://www.what.org) or by calling WHAT at (508) 349-9428.**
