

Woods Hole Research Center
Advancing Science. Informing Solutions.

Join us for a new lecture series:
Environmental *Tipping Points*

Thursday, August 22 at 5:30 p.m.

Dr. Richard A. Houghton
WHRC Senior Scientist
presents

Carbon Dioxide and a Runaway Greenhouse

How likely are we to limit the rise in warming to 2° C?

How can we? What might happen if we don't?

**Woods Hole Research Center
Harbourton Auditorium
149 Woods Hole Road, Falmouth**

Limited parking and seating.
Reservations highly recommended:
events@whrc.org • 508-444-1517

**Save the Dates: the lecture series continues on
September 26 & October 24.**

Visit our website for details: www.whrc.org

The mission of the Woods Hole Research Center is to advance scientific discovery and seek science-based solutions for the world's environmental and economic challenges through research and education on forests, soils, air, and water.
