

Got currents?

Build-a-drifter

Educator professional development workshop

Looking for a unique and meaningful way to teach oceanography while connecting students to real-science tools and applications of technology? Build an ocean-going drifter and deploy it. Your students will be amazed as they watch and learn in real-time how surface ocean currents circulate in your area. Professional development around using ocean observing data and tools in the classroom will be included.

WHEN: Saturday, May 10, 2014
10:00 am to 4:00 pm

WHERE: Woods Hole Oceanographic Institution
Woods Hole, MA

WHO: Teachers and informal science educators

COST: \$25 per person*

Sponsored by the Woods Hole Oceanographic Institution, NERACOOS, the NOAA Northeast Fisheries Science Center, Gulf of Maine Marine Educators Association, Massachusetts Marine Educators, and Southern New England Marine Educators.

*Membership in one of the Marine Educators Chapters is required in order to participate. More information will be available during registration.
