

COASTAL PLANTS 2015

MOVING BEYOND JUST BEACHGRASS

Using a Variety of Species & Techniques to Stabilize the Shoreline

Save the Date

May 29, 2015

Workshop registration opens May 4th

Topics of Interest

- Efforts to broaden plant diversity on dunes and shorelines
- Issues with plant adaptation to climate change and sea level rise
- Potential ways to minimize the use of inorganic fertilizers
- Lessons learned after Hurricane Sandy

Audience: coastal managers, environmental organizations, growers, town officials, staff, conservation commissions, landscapers, & anyone else interested in learning more about how plants stabilize shorelines

Easy parking at the WHOI Quissett Campus and for our colleagues on the islands we're providing free pick-up/drop-off at Woods Hole Ferry Terminal.

DETAILS: May 29, 2015
WHOI, Quissett Campus
Woods Hole, MA
