

# Massachusetts Emergency Management Agency

## Course Announcement

**Course Name:** HURRIPLAN Resilient Building Design for Coastal Communities

**Course Code:** PER-306

**Course Purpose:** This two-day performance-level course will provide professionals with the training necessary to integrate resilient community planning and building design strategies with civic and commercial projects located in hurricane-prone areas. In addition to discussing existing regulations, this course will feature best practices that may increase community shelter capacity while addressing design concerns such as sustainability, accessibility, architectural aesthetics, and regional culture.

- Course Topics:**
- Hurricane Science & Hazards
  - Infrastructure Failure
  - Building Design case studies
  - Community Resources and Insurance
  - Zoning Code Strategies
  - Building Code Regulations
  - Guidelines and Best Practices
  - Building Envelope Technology
  - Community Saferoom Planning and Building Design

**Target Audience:** This course is targeted for a broad cross section of professionals involved in emergency management, planners, building and zoning officials, mitigation specialists, developers, engineers, land owners, architects, building managers and owners.

**Other:** This training course is approved for AIA/CES programs.  
AIA members in good standing are eligible to earn 14 HSW units.

### How to Apply:
