March/April Listings:

Tuesday, March 8, 1-2 PM

“Cutting Carbon Emissions” - Learn about opportunities for saving energy, reducing your bills and meeting individual, state, regional and global goals. Presented by Chris Powicki, Adjunct Professor of Energy, Cape Cod Community College and President of Water Energy Ecology Information & Design Services. Cape Cod Community College, Science Building Lecture Hall C, 2240 Iyannough Road, Route 132, Barnstable.

Tuesday, March 29, 2016, 2 - 3 PM

“Testing the Waters” - Since 2006, CCS has been monitoring the waters of Cape Cod Bay from the shorelines of Provincetown to Duxbury for temperature, salinity, dissolved oxygen, turbidity, chlorophyll a, nutrients and, most recently, pharmaceutical compounds. What the data tells us about the current quality and health of this State Ocean Sanctuary. Presented by Amy Costa, Cape Cod Bay Monitoring Program Director, Center for Coastal Studies, CCS Larkin Hall, Hebert Marine Lab, 5 Holway Avenue, Provincetown.

Wednesday, April 13, 2016, 10:30AM - 12 PM

“Blood Suckers” - Mosquitos and ticks transmit diseases globally with just a simple bite. Within the last few years new species of both insects and disease have been discovered. How these blood suckers affect and infect our region will be discussed. Presented by Gabrielle Sakolsky, Assistant Superintendent, Cape Cod Mosquito Control Project, and Larry Dapsis, Deer Tick Project Coordinator, Barnstable County Extension Service, South Yarmouth Library, 312 Old Main Street, So. Yarmouth.
