Humpback Whale, *Megaptera novaeangliae*, Stellwagen Bank National Marine Sanctuary.

Join Keith Ellenbogen and Tom Consi to explore the local marine habitat of Stellwagen Bank National Marine Sanctuary just 25 nautical miles outside of Boston and 6 nautical miles from Cape Cod. Beneath the surface is a dynamic environment with extraordinary marine wildlife that includes apex predators such as great white sharks, ocean giants like humpback whales, schools of mackerel, and an entire microscopic ecosystem of planktonic creatures that are even visible from space.

Keith Ellenbogen is an acclaimed underwater photographer, Assistant Professor Photography SUNY/FIT, Visiting Artist at MIT Sea Grant, and 2018 TED Resident.

Dr. Tom Consi is a Research Scientist at MIT Sea Grant.

Keith and Tom have been collaborating over the past few years on the artistry and science of ocean microscopy.
