

Modelling Plastics in the Oceans

What is happening? What can we do about it?

Advances in sensing and computer modelling let us track the dispersion of plastics through the environment more accurately than ever before.

Join our distinguished speakers for an MIT Plastics and the Environment Program workshop exploring a critical challenge to the health of Earth's oceans in the 21st century.

November 6-8, 2019
at the MIT Samberg Center

Register at tickets.mit.edu
or tinyurl.com/oceanplastics2019

Featuring Speakers From:

Woods Hole Oceanographic
Institution

Massachusetts Institute of
Technology

University of Oxford

Brown University

The Rozalia Project

University of Quebec Rimouski

University of Western Australia

University of Auckland

University of Alberta

Workshop Agenda

Wednesday, November 6

9:00: Welcome and Opening Remarks

John Fernandez, MIT Environmental Solutions Initiative

9:30: Keynote Address with Kara Lavender Law
Sea Education Association, Woods Hole Oceanographic Institution

11:00: Talk Session

Scott Gallager, WHOI: *Autonomous instrument measurements of microplastics*

Rachael Miller, Rozalia Project: *Observations of micro- and nano-plastics*

Daniel Bourgault, Christiane Dufresne and Sandy Gregorio, U. Quebec Rimouski:

Modelling and observational resources to examine plastic transport from the St. Lawrence River

1:30: Talk Session

Glenn Flierl, MIT: *Congregation of plastics in the surface ocean*

Samuel Levang, WHOI: *Dispersion of plastics in the global ocean*

Jake Gebbie, WHOI: *Why microplastics could constrain ocean circulation in inverse models*

Carol Anne Clayson, WHOI: *Ocean turbulence, mixing, and vertical distribution of microplastics*

3:30: Breakout Session: Future Research Directions for MIT/WHOI Collaboration

Thursday, November 7

9:00: Talk Session

Ton van den Bremer, U. Oxford: *Transport of floating marine debris by waves*

Colin Whittaker, U. Auckland: *Experimental investigation of surface wave transport*

Michelle DiBenedetto, WHOI: *Ocean wave and particle-shape effects on microplastics transport*

11:00: Breakout Session: Collaboration Opportunities with Foundations, NGOs, Corporations and Governmental Organizations

1:30: Talk Session

Tom Peacock, MIT: *Particle sedimentation and settling in deep sea mining*

Bruce Sutherland, U. Alberta: *Collective settling from fresh to salt water*

David Deepwell, U. Alberta: *Resuspension from shoaling internal solitary waves*

3:30: Breakout Session: Funding Opportunities for Future Work

Friday, November 8

9:00: Talk Session

Pierre Lermusiaux, MIT: *Numerical modelling of particle transport*

Aleksey Sadekov, U. Western Australia: *Geochemistry of microplastic*

Baylor Fox Kemper, Brown University: *Submesoscale and Langmuir turbulent transport at the ocean surface of plastics, oil, and drifters*

11:00: Breakout Session: What Have We Learned and What Are the Next Steps?

MIT Environmental Solutions Initiative
Plastics and the Environment Program

Agenda is preliminary
