

2021 Erosion & Sediment Control Fall Field Days

Join us for a hybrid event experience - virtual topical presentations followed by in person demonstrations of some of the latest sediment and erosion control products! Field Days provide training for land development professionals focusing on site stabilization, soil erosion control, and water quality management. Participants include staff of natural resource management and transportation agencies, municipal planning and public works departments, civil engineers, construction and landscaping contractors, public utility operators, and consultants. Registered participants who attend both sessions are eligible for 6.5 hours of continuing education credits.

Register via Eventbrite

\$55 General Admission
