

Book a Field Trip to Penikese Island!

The Penikese Island School is offering field trips for school groups to Penikese Island, a 45min boat ride from Woods Hole. Spend the day immersed in nature on a remote island.

The island has a fascinating history, which includes its use as a Wampanoag hunting and fishing camp, a school for the study of natural history (precursor to the Marine Biological Laboratory), a leper colony, a school for troubled youth, and a wildlife sanctuary.
