SUMMIT
2023

connecting climate, communities, and coasts

ABOUT THE SUMMIT

Join the **New England Ocean Science Education Collaborative (NEOSEC)** for engaging workshops, field trips, network-building opportunities, and presentations related to ocean literacy, climate change, and preparedness needed along our New England shores. Connect with people from across New England and beyond to discuss how we live and thrive on the edge of the ocean.

We are excited to invite community members and groups from all sectors to join us for the 2023 Ocean Literacy Summit taking place in Gloucester this November. Individuals and organizations can join us to present, sponsor, and/or attend the conference.

We welcome perspectives on climate, coast, and community from all ages, backgrounds, and walks of life. Youth groups are invited to attend or present accompanied by adult chaperones.

Conference registration opens for participants on September 1st

ABOUT NEOSEC

NEOSEC is a collaboration of more than 45 institutions from across New England, including aquariums, museums, universities, government entities, and science and research centers, working collectively to advance ocean literacy. The Ocean Literacy Summit is a signature event of the Collaborative.

WAYS TO GET INVOLVED

- Present a lightning talk or workshop
- Present a poster
- Participate in a panel discussion
- Host an exhibit table showcasing your work/organization
- Sponsor the conference
- Share this opportunity with your network
- Attend the conference
- Contact us if you have another idea for how you/your organization could be involved!
