

## Ecology's Marine News: "EYES OVER PUGET SOUND"

Surface condition report from May 12, 2014 is now available.

[http://www.ecy.wa.gov/programs/eap/mar\\_wat/surface.html](http://www.ecy.wa.gov/programs/eap/mar_wat/surface.html)

What you will find:

The weather changed to sunny warm conditions and light northerly winds on Mother's Day. At the water surface, blooms and large debris lines occur in Bellingham, Padilla, and Samish Bays, Hood Canal, East Sound, and the Straits, as well as the finger inlets of South Sound. Large amounts of sediment-laden water from Port Susan are flowing into Central Basin. Turquoise water mixing to the surface in places around the San Juan Islands. Meet Eyes Under Puget Sound: Sediment Monitoring Program at Ecology.

The pdf document is around 10 MB, upload times may vary.

The pdf document has clickable navigation links.

Source images of the entire flight are located at:

[ftp://www.ecy.wa.gov/eap/Flight\\_Blog/latest\\_pictures/](ftp://www.ecy.wa.gov/eap/Flight_Blog/latest_pictures/)

**Note:** If you wish to have access to images right after the flight please send me an e-mail at [ckre461@ecy.wa.gov](mailto:ckre461@ecy.wa.gov) and I will put you on a pre-release alert list with an ftp link.

We hope the images are inspiring and informative.

With best regards,

Christopher and the Marine Monitoring Unit
