# Eyes Over Puget Sound

Field log | Climate | Water column | Aerial photos | Ferry monitoring | Streams

## Surface Conditions Report June 8, 2015

Puyallup River at a record low flow

Start here

*Up-to-date observations of visible water quality conditions in Puget Sound and the Strait of Juan de Fuca*

**Record warm water temperatures and low oxygen** continue in Ecology's Puget Sound marine monitoring station network. Record low stream flows result in visibly low river discharge into Puget Sound, in particular for the Puyallup River. Abundant sun and unusually warm water temperatures fuel phytoplankton blooms in many areas. Bright orange Noctiluca blooms are surfacing in the Commencement Bay area and around Port Madison. Finger inlets of South Sound support extensive patches of jellyfish.

The pdf document is around 10 MB, upload times may vary.

The pdf document has clickable navigation links.

Source images of the entire flight are located at:

[ftp://www.ecy.wa.gov/eap/Flight\\_Blog/latest\\_pictures/](ftp://www.ecy.wa.gov/eap/Flight_Blog/latest_pictures/)

**Note:** If you wish to have access to images right after the flight please send me an e-mail at [ckre461@ecy.wa.gov](mailto:ckre461@ecy.wa.gov) and I will put you on a pre-release alert list with an ftp link.

We hope the images are inspiring and informative.

With best regards,

Christopher and the Marine Monitoring Unit
