Surface Conditions Report, *September 26, 2016*

Critter of the Month – *The Sweet Potato Sea Cucumber*

Start here

Scuba info Up-to-date observations of water quality conditions in Puget Sound and coastal bays

What you will find:

September is jellyfish season and they are everywhere in southern Puget Sound! Sunny, warm, and dry conditions promoted strong late-summer plankton blooms in colors of red, green, and brown, now widespread in many bays. In contrast, Central Sound looks clear with low algal activity. Southern Puget Sound has large floating mats of organic material and developed lower oxygen in August. Meet the Critter of the Month - The Sweet Potato Sea Cucumber.

We created a survey to get your feedback on EOPS, [click here](#).

The pdf document is around 10 MB, upload times may vary. It has clickable navigation links.

Source images of the entire flight are located at:

ftp://www.ecy.wa.gov/eap/Flight_Blog/latest_pictures/

Note: If you wish to have access to images right after the flight, please send me an e-mail at ckre461@ecy.wa.gov and I will put you on a pre-release alert list with an ftp link.

We hope the images are inspiring and informative.

With best regards,

Christopher Krembs and the Marine Monitoring Unit
