

Ecology's Marine News: "EYES OVER PUGET SOUND"

Surface condition report "April 2021" is now available.

Download here:

<https://www.copugetsound.org/articles/eyes-over-puget-sound-surface-conditions-report-april-1-2021>

At a glance:

After a wet winter/spring transition it has been noticeably drier, warmer and sunnier. River flows are near normal levels and in Puget Sound and coastal Bays salinity is increasing above normal. The spring bloom is developing but not very pronounced, yet, Noctiluca is already visible in southern Hood Canal. Suspended sediment near rivers and creeks, failing bluffs, and shellfish activities are frequent. Capturing herring spawning from the plane is informative; pilots share their observations.

The pdf document is around 10 MB, upload times may vary. It has clickable navigation links.

We hope the images are inspiring and informative.

With best regards, Christopher Krembs and the Marine Monitoring Unit
